TO OUR CUSTOMERS

WE LIST 200 of the leading and best varieties of seeds and take greatest care to secure only the best strains. Our seed is grown especially for us by the most reliable growers in various parts of the United States, so that it may be produced in the section that is best suited for the variety. For example, our Lima Bean seed is grown in California, Beans in Idaho, Cantaloupe in Colorado, Corn in Connecticut, Spinach and Turnip in the State of Washington, Peas in Wyoming, Onion Sets in Illinois, etc. Contracts are placed twelve to eighteen months before the seed is to be delivered or before the grower plants the seed stock. This is done to secure only fresh and highest-quality seeds for our customers.

We have a self-service seed department. All of the leading varieties of seeds will be packed in packets, ounces, $\frac{1}{4}$ pounds, $\frac{1}{2}$ pounds and pounds. $\frac{1}{2}$ pounds and pounds will be packed in transparent polyethylene bags. This self-service department is in addition to our counter service. This enables us to give faster and better service.

Fifty-three years' experience as seedsmen and commercial growers has taught us that only the best strains are worth while. We endeavor at all times to secure the highest-quality seeds obtainable and to offer them at minimum prices. All seed is carefully tested and none is allowed to be sold that we know to be poor in germination or in any way inferior.

Our store is located at the corner of Atlantic and Center Avenues opposite the Penna.-Reading Railroad Station at Sewell, N. J., twelve miles south of Camden. We welcome customers and friends to our store and shall be glad to show our seeds and plants.

TERMS

Seeds and Supplies: Cash with order, otherwise shipment will be made C. O. D. **Plants:** Cash with order, no C. O. D. orders accepted. Remittance can be made by Check, Postal Money Order, Express Money Order or Registered Letter. You are protected by our safe delivery guarantee.

The fact being well known that no reputable seedsman now guarantees seeds in any respect renders it unnecessary for us to say very much on this point, because it must be apparent to every intelligent person that no seedsman can afford to send out poor or worthless seeds. There could be no more certain way of destroying his business.

While we exercise the greatest care to have all seeds, plants and bulbs pure and reliable, we give no warranty express or implied, as to description, purity, productiveness, variety, or any other matter of any seeds, plants, or bulbs that we send out; and we will not in any way be responsible for the crop. Therefore in no case will Orol Ledden & Sons be liable for more than the amount actually paid us for seeds, plants or bulbs. If the purchaser does not accept the goods on these terms, they are to be returned at once and the money paid will be refunded.

All prices quoted in this Catalog are subject to change without notice.
OROL LEDDEN & SONS

SAFE DELIVERY GUARANTEED. All seeds and plants are guaranteed to arrive in first-class condition, and if they do not, mail carrier or expressman should be notified on delivery. If damaged, request him to make notation of damage, sign and mail to us at once, and more seeds or plants will be forwarded or money refunded.

Cabbage

Sow early varieties in coldframe in January and February; in open, in March and April. Sow late varieties April 15 to June 1.

"Yellows-Resistant" following the name of the variety of Cabbage means that variety has been developed for resistance to the cabbage-yellows disease. Our Yellows-Resistant seed has been grown by the leading and original growers specializing in Yellows-Resistant strains. Yellows-Resistant does not guarantee, nor do we guarantee 100% immunity from yellows. However, we believe we are offering the best seed obtainable.

Tomato Plants *Field-Grown plants ready June 1 to July 10*

We have specialized in the growing of Tomato plants during the past fifty-one years. This year we will have about ten acres of field-grown Tomato plants to offer to the commercial grower, canner and gardener. Almost all of our Tomato plant acreage will be planted in the two leading varieties, Rutgers and Garden State. All of our Rutgers and Garden State plants will be grown from New Jersey State Certified Seed. We expect to have field-grown Tomato plants ready the last week in May and throughout the month of June.

BLOCKED TOMATO PLANTS IN 4-INCH BLOCK and potted in 3-inch pots, ready May 1 to June 1. Valiant, Marglobe and Rutgers. 80 cts. per doz.

NOTE: No shipments on Blocked Tomatoes.

Garden State. Grown from New Jersey State Certified Seed. Good red fruits, globe shape, slightly flattened. Good yielder used for second-early and late planting. Vine vigorous. 80 days maturity.

BIRD Vita-Bands and Pots

One of the ways to grow healthier, sturdier crops that mature early and command top prices is through the use of these famous plant bands. Nutrient-treated Vita-Band 10 aids plant growth from seedling stage through transplanting time. Nutrient-treated Vita-Band D is set with the plant, thus eliminating the possibility of transplanting shock.

No. 119 Garden Plow and Cultivator Price \$11.25

A NEW PLANET JR. SUPER PLANETILLER with an Exclusive Idea. Price \$255.50

This is a popular, medium-sized unit designed for working larger plots of land. For home gardeners, institutions, nurserymen and growers of a wide variety of crops, the New Super Planetiller meets the need. Ample power is available with the 4-cycle, 2 3/4 H.P. engine equipped with recoil starter and snap shut-off. A new and practical idea operating behind the eight 12-inch tines is a roller 8 1/4 inches in diameter and 14 1/2 inches wide. It completely settles the tilth.

Offset Handles. This new Planet Jr. idea makes it possible for the operator to offset the handles either to the left or to the right of the tilled soil by means of a spring latch located on the handles. Two separate clutch controls conveniently located provide for engaging the clutch on the roller to make the Super Planetiller self-propelled, or by simply engaging the clutch to drive the tines, will give you forward motion as the tines work the soil. Price \$255.50.

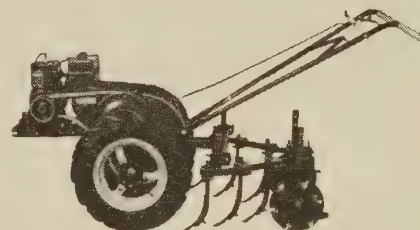

The range of usefulness for small tractors can hardly be defined. Nor does the size of the operation determine their value, because within limits of power and weight they do almost everything. Equipment is as important as the tractor. Having been in the business of making seeding, cultivating, and fertilizing tools over 75 years, Planet Jr. is recognized as the leader.

The constant improvements and additions to the line have caused more and more users to appreciate the advantages of purchasing equipment that has been developed with such careful attention to details of construction as has been the case in Planet Jr. garden tractors. The Planet Jr. tractors now offered are the 5-horsepower HW model, the 2 1/2-horsepower B-8 model and the 2-horsepower model BP-1. Rubber tires are standard on all models. The best guarantee for a product is the reputation of its maker. Remember that time and labor-saving features and the reliability of Planet Jr. today are the result of long years of experience.

Ledden's Lawn Mixture for Dry, Infertile Soils. This mixture meets the basic requirements of the dry, infertile soils lawn seed recommendations of the New Jersey Agricultural Experiment Station. Analysis: Creeping Red Fescue 35%, Common Rye Grass 15%, Redtop 5%, White Dutch Clover 5%, Meadow Fescue 15%, Chew-ing's Fescue 25%. Lb. 85 cts.; 5 lbs. \$4.00; 10 lbs. \$7.75; 25 lbs. \$17.50.

Colonial Lawn Seed Mixture. Analysis: 20% Perennial Rye Grass, 20% Kentucky 31 Fescue, 15% Timothy, 20% Domestic Rye Grass, 15% Meadow Fescue, 10% Creeping Red Fescue. 5 lbs. \$1.59; 25 lbs. \$7.49.

We use the purest seed obtainable and of the highest germination; however, because each variety of grass seed has a very small content of inert matter, mostly in the form of seed hulls, there will be a slight variation of content from the above analyses. The analysis given on the grass seed bag will, therefore, read slightly different from the analysis stated above. However, the basic mixtures as described above will be the same.
